

# **Tomcat, Struts ve Eclipse Enterprise Edition Kurulumu**

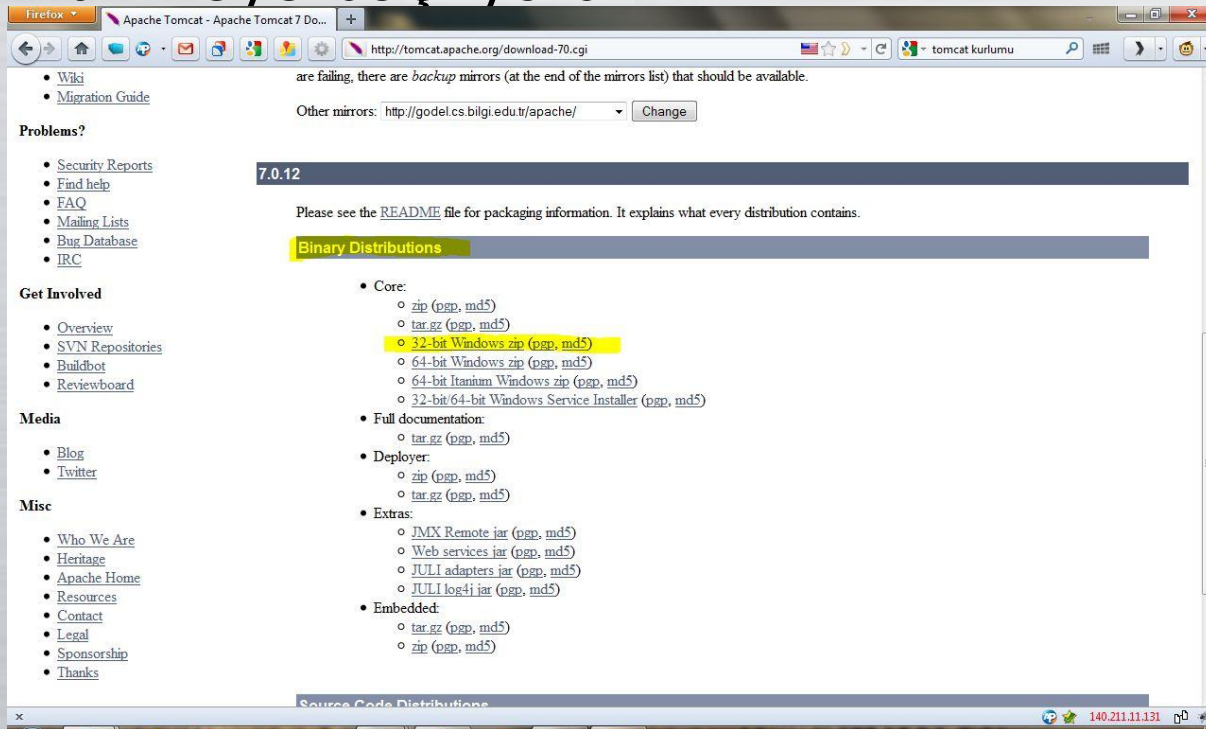

# Tomcat Uygulama Sunucusunun Kurulumu

- İlk olarak <http://tomcat.apache.org> adresine gidiyoruz.

# Tomcat Uygulama Sunucusunun Kurulumu-2

- **Binary Distributions** başlığı altındaki **Core:** seçeneğinin altında **32-bit Windows zip** yazısını göreceksiniz. Buraya tıklıyoruz ve bilgisayarımıza indirmeye başlıyoruz.

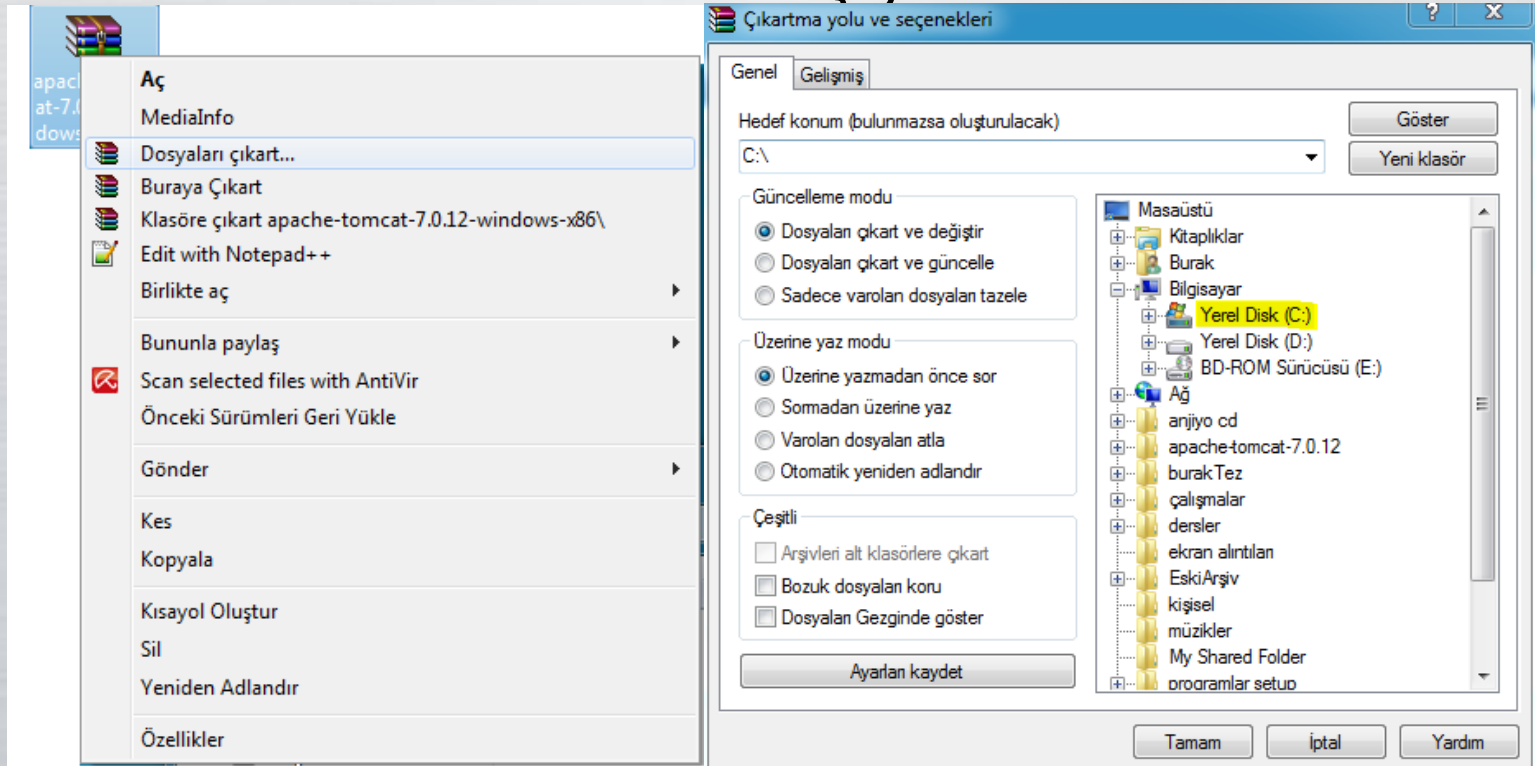

# Tomcat Uygulama Sunucusunun Kaydedilmesi

# Tomcat Sunucusunu C:\'e çıkarma

- İndirdiğimiz dosyayı alttaki ekran görüntüsünde görüldüğü gibi WinRAR benzeri bir arşiv yöneticisiyle C:\ sürücümüzün kök dizinine açıyoruz.

# Java JDK ve JRE'nin Kurulumu

- <http://download.oracle.com/otn-pub/java/jdk/6u25-b06/jdk-6u25-windows-i586.exe> linkinden gerekli **jdk** dosyası indirilir ve çalıştırılır.
- <http://download.oracle.com/otn-pub/java/jdk/6u25-b06/jre-6u25-windows-i586.exe> linkinden gerekli **jre** dosyası indirilir ve çalıştırılır.

## Java SE Downloads

Thank you for downloading this release of the Java™ Platform, Standard Edition Development Kit (JDK™). The JDK is a development environment for building applications, applets, and components using the Java programming language.

The JDK includes tools useful for developing and testing programs written in the Java programming language and running on the Java™ platform.

You must accept the [Java SE 6 JDK License Agreement](#) to download this software.

Thank you for accepting the Java SE 6 JDK License Agreement; you may now download this software.

## Java SE Downloads

Do you want to run Java™ programs, or do you want to develop Java programs? If you want to run Java programs, but not develop them, download the Java Runtime Environment, or JRE™.

If you want to develop applications for Java, download the Java Development Kit, or JDK™. The JDK includes the JRE, so you do not have to download both separately.

You must accept the [Java SE 6 JRE License Agreement](#) to download this software.

☒ Accept License Agreement ☐ Decline License Agreement

# Tomcat Kurulumunun Yapılandırılması

- Şimdi Tomcat kurulumumuzun **Çevresel Değişkenler** ayarlarını yapalım.
- Bunun için, **Denetim Masası -> Sistem -> Gelişmiş -> Çevresel Değişkenler** 'e girelim.

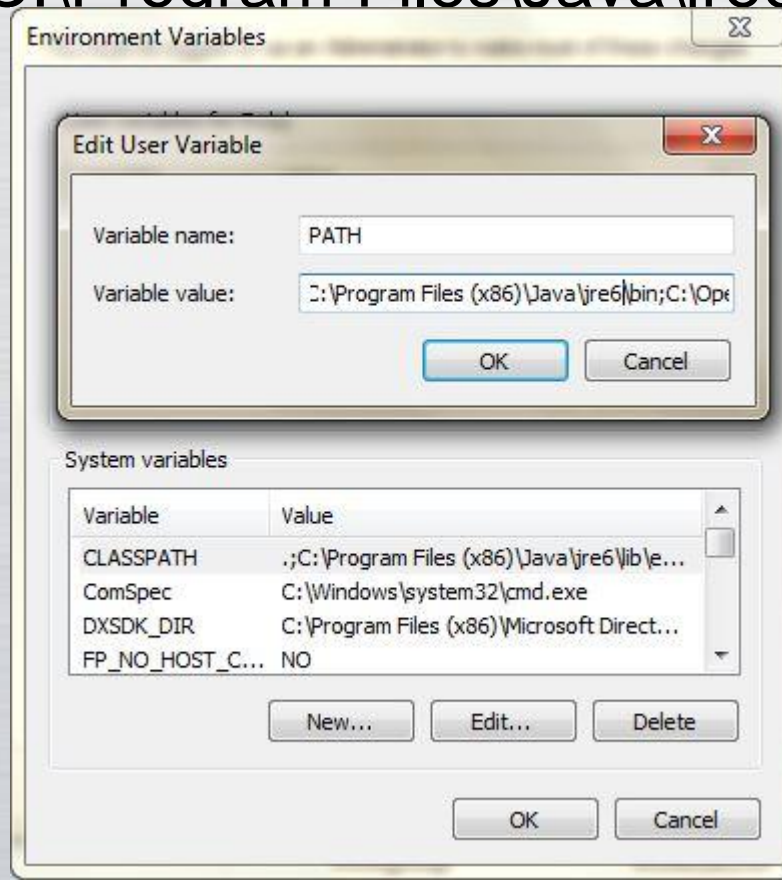

# JAVA\_HOME Değişkeninin Ayarlanması

- JAVA\_HOME değişkeniniz JDK'nızın kurulu olduğu dizini (örneğin C:\Program Files\Java\jdk1.6.0\_25) işaret etmelidir.

# PATH Değişkeninin Ayarlanması

- PATH değişkeniniz JRE'nizin kurulu olduğu dizini (örneğin C:\Program Files\Java\jre6\bin) işaret etmelidir.

# Tomcat Sunucusunun Test Edilmesi

- Kurulum işlemi tamamlandı. Şimdi Tomcat kurulumumuzu test edelim. İlk olarak **C:\apache-tomcat-7.0.12\bin** dizinine gidiyoruz. Ve buradaki **startup.bat** dosyamıza çift tıklıyoruz.
- Eğer çevrsel değişkenlerimizde bir hata varsa görüntü bu şekildedir.

Hata varsa, düzeltip tekrar startup.bat'ı tıklayalım.

```

# Tomcat Sunucusunun Test Edilmesi-2

- Uygulamalarımızı test edeceğimizde bu komut istemi penceresi açık kalmalıdır. Şimdi bir Internet Explorer veya Firefox ekranı açalım ve adres satırına **http://localhost:8080** yazalım.

Tomcat kurulumunu  
başarıyla  
tamamladınız.

# Java Enterprise Edition Kurulumu

- İlk olarak <http://www.eclipse.org/downloads/> adresine girilir.
- Eclipse IDE for Java EE Developers içerisinde Windows 32 bit dosyası indirilir.

# Struts kurulumu

- <http://struts.apache.org/> sitesinden Struts 2.2.1.1 dosyası indirilir ve klasöre çıkartılır.

The screenshot shows the Apache Struts website in a Firefox browser window. The browser's address bar displays <http://struts.apache.org/>. The website header features the Apache Software Foundation logo on the left and the word "Struts" in a large, stylized font on the right. Below the header, there is a navigation bar with links for "Apache", "Struts 2", and "Struts 1".

The main content area is titled "Recent Releases" in red. It contains three release announcements:

- 20 Dec 2010 - Struts 2.2.1.1 General Availability Release**  
The latest production release of Struts 2 is **Struts 2.2.1.1**, which was promoted to "General Availability" (or "Ready for Primetime") on 20 Dec 2010. The [release notes](#) are available online.  
Struts 2.2.1.1 includes important security fixes. All developers are strongly encouraged to update existing Struts 2 applications to Struts 2.2.1.1.
- 04 Dec 2008 - Struts 1.3.10 General Availability Release**  
The latest production release of Struts 1 is **Struts 1.3.10**, which was promoted to "General Availability" (or "Ready for Primetime") on 04 Dec 2008.
- 24 Nov 2008 - Struts 2.0.14 General Availability Release**  
The latest release of Struts 2 is **Struts 2.0.14**, which was promoted to "General Availability" on 24 November 2008.  
For changes included in Struts 2.0.14, see the [release notes](#). Struts 2.0.14 is a bugfix release for version 2.0.12, which provided important security fixes. Struts 2.0.14 addresses two major bugs introduced with these security fixes, keeping the FilterDispatcher from serving built in static resources, and keeping conversion error messages from being displayed. All developers are strongly encouraged to update existing Struts 2.0.x applications to the latest available 2.2 version, or at least to Struts 2.0.14.

The left sidebar contains a "Navigation" menu with links for "Welcome", "Releases", "Announcements", "Kickstart FAQ", "Roadmap FAQ", "Website Stats", "Thank!", "Sponsorship", "Documentation", "Support", "Development", "Related Projects", and "Similar Projects".

## Struts 2.2.1.1

Apache Struts 2.2.1.1 is an elegant, extensible framework for creating enterprise-ready Java web applications. It is available in a full distribution, or as separate library, source, example and documentation distributions. Struts 2.2.1.1 is the "best available" version of Struts in the 2.2 series.

# Tomcat - Eclipse Entegrasyonu

- **Eclipse Helios** çalıştırılır. **Window** menüsünden **Preferences** seçilir.

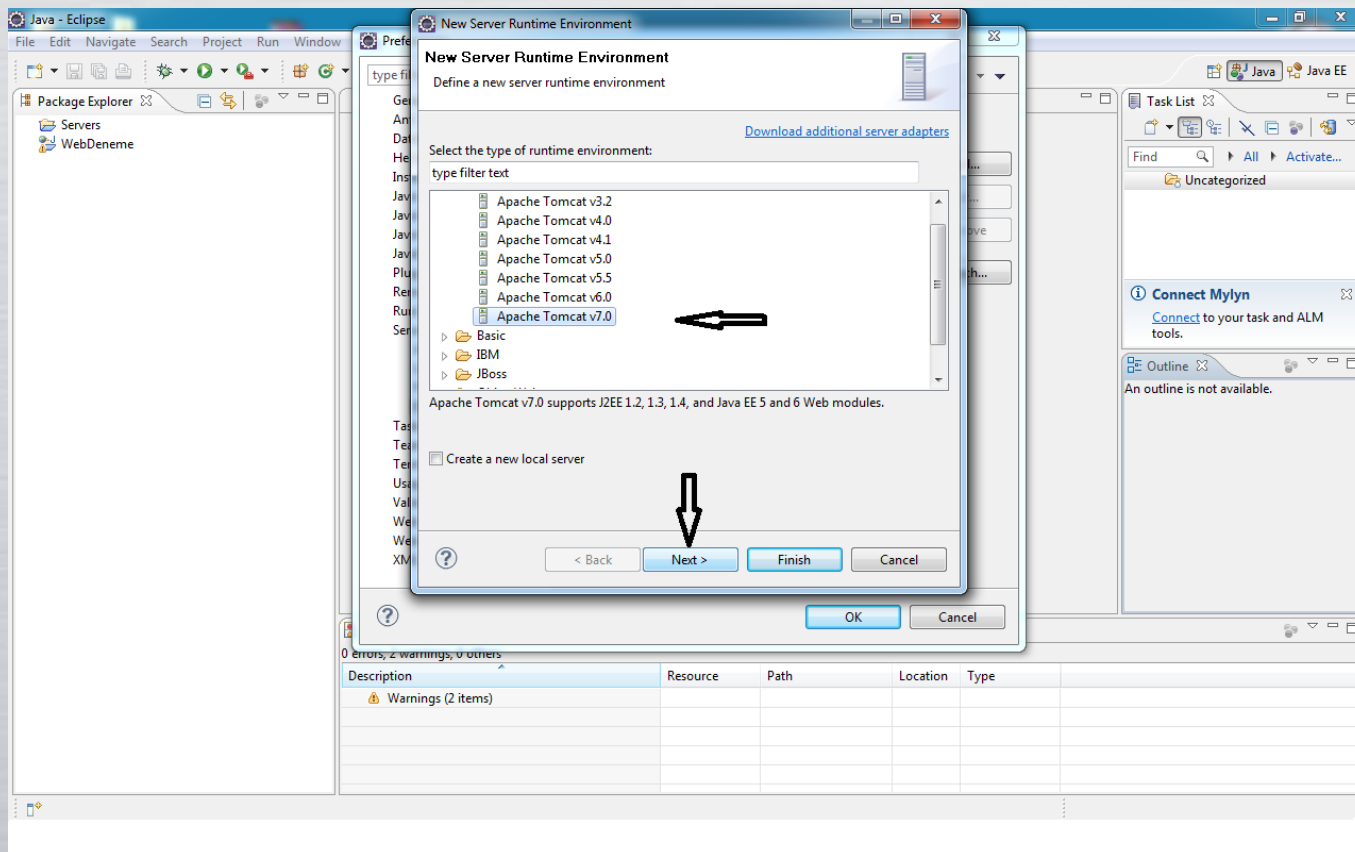

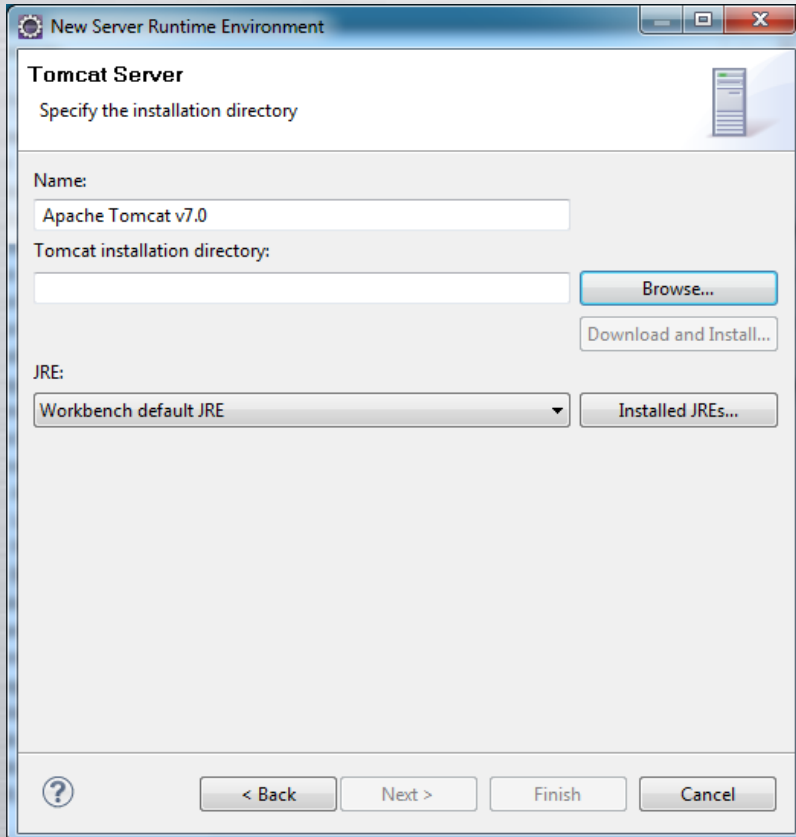

- **Server** sekmesinden **Runtime Environments** seçeneği tıklanır. Gelen menüde **Add** butonu seçilir.

- Menüden **Apache Tomcat v7.0** seçilerek **Next** butonuna basılır.

- **Browse** butonuna basılarak **Tomcat** in yüklü olduğu dizin seçilir ve **Finish** butonuna basılır.

 New Server Runtime Environment

### Tomcat Server

 Tomcat requires a Java SDK in order to compile JSP files. Ensure that the JRE preference settings point to an SDK install location.

Name:

Tomcat installation directory:

Browse...

Download and Install...

JRE:

Workbench default JRE

Installed JREs...

< Back

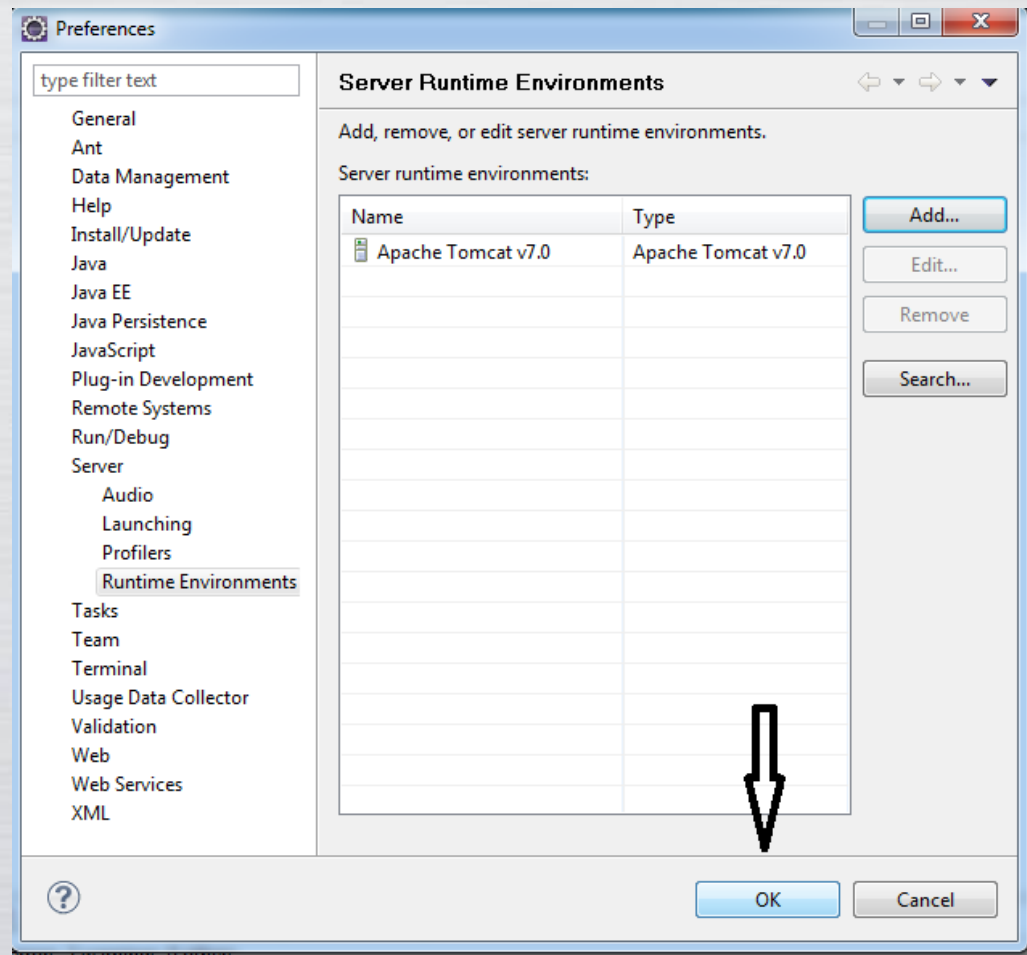

Next >

Finish

Cancel

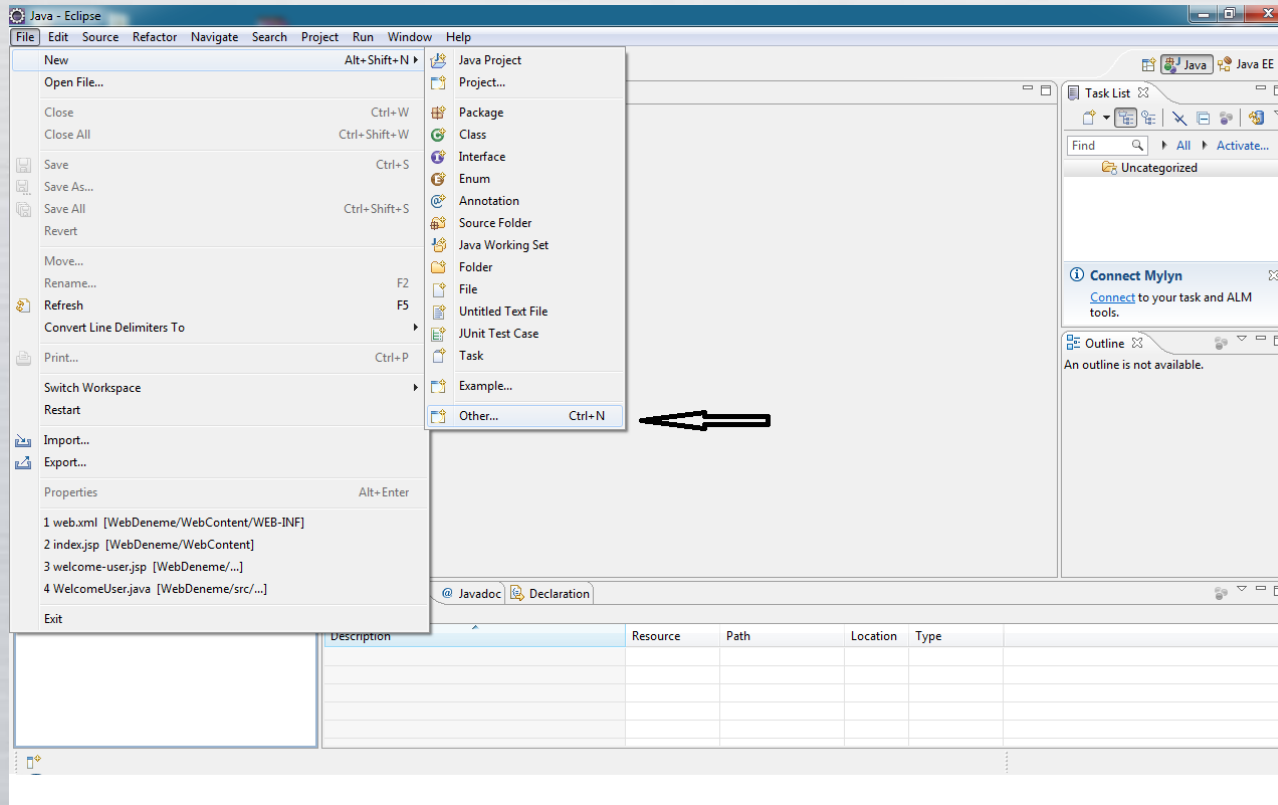

- Son olarak gelen menüden **Ok** butonuna basılarak işlem tamamlanır.

# Struts Kütüphanelerinin Eclipse EE ye eklenmesi

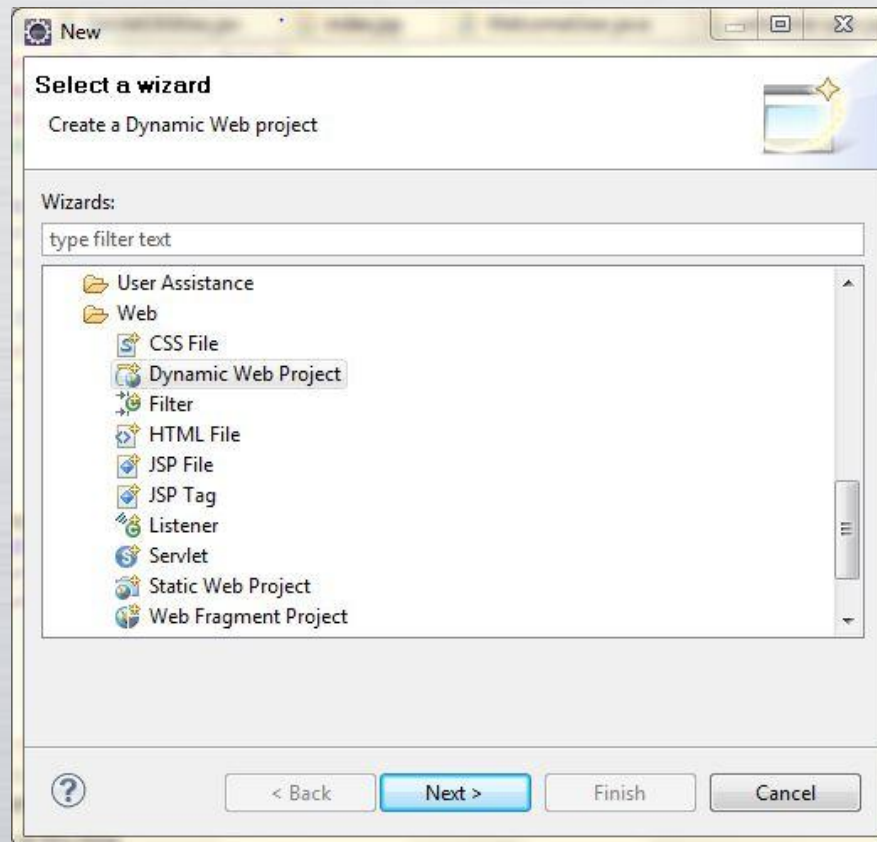

- Eclipse Helios çalıştırılır. **File** sekmesinden **New Other** seçeneği tıklanır.

# Yeni Bir Web Projesi Oluşturulması

- **Web** sekmesinden **Dynamic Web Project** seçeneği seçilerek **Next** butonuna basılır.

- Projeye bir isim verilerek **Target runtime** olarak **Apache Tomcat v7.0** seçilir ve **Next** butonuna basılır.

**New Dynamic Web Project**

Create a standalone Dynamic Web project or add it to a new or existing Enterprise Application.

Project name:

Project location

☒ Use default location

Location:

Target runtime

Dynamic web module version

Configuration

A good starting point for working with Apache Tomcat v7.0 runtime. Additional facets can later be installed to add new functionality to the project.

EAR membership

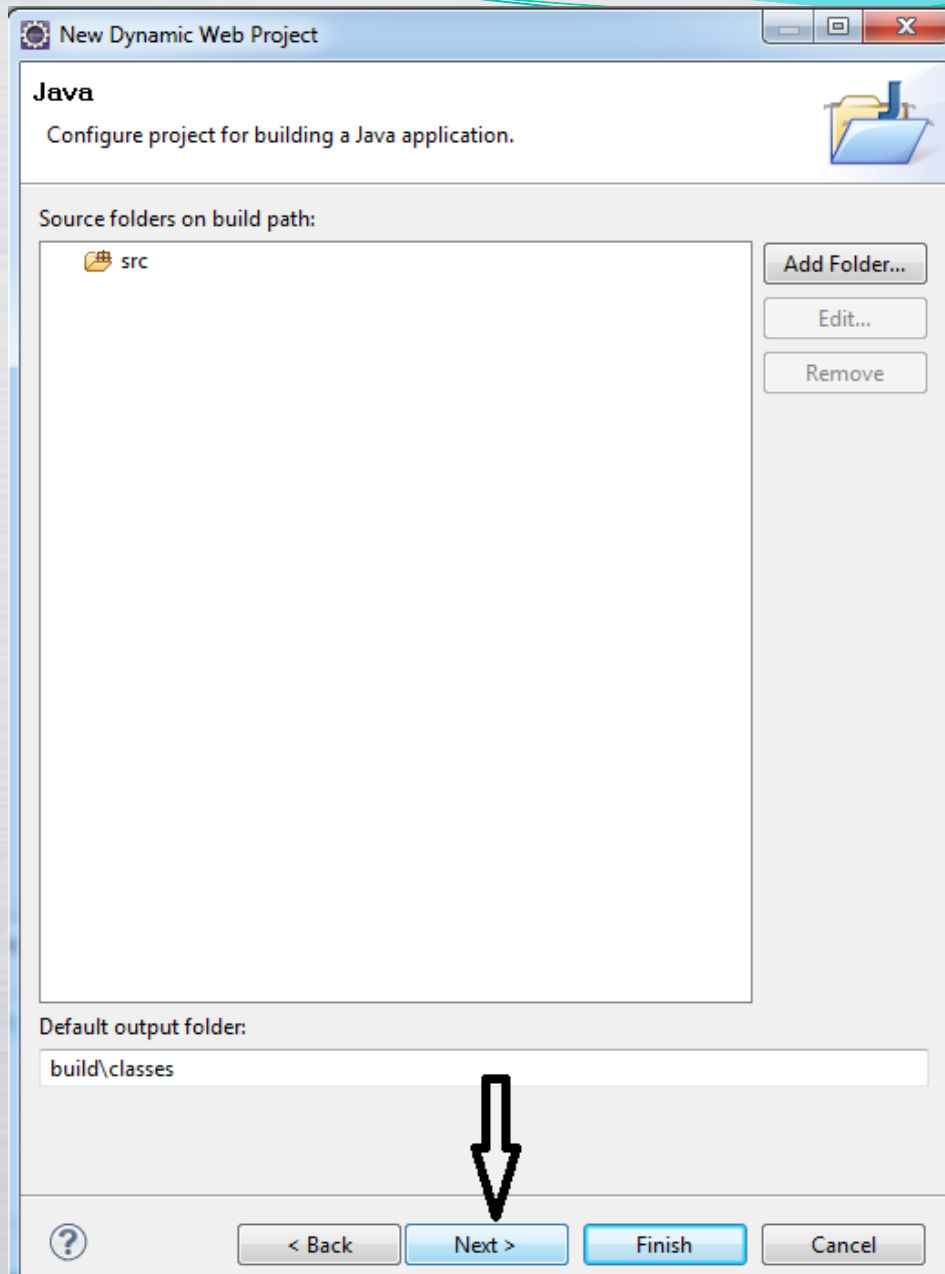

☐ Add project to an EAR

EAR project name:

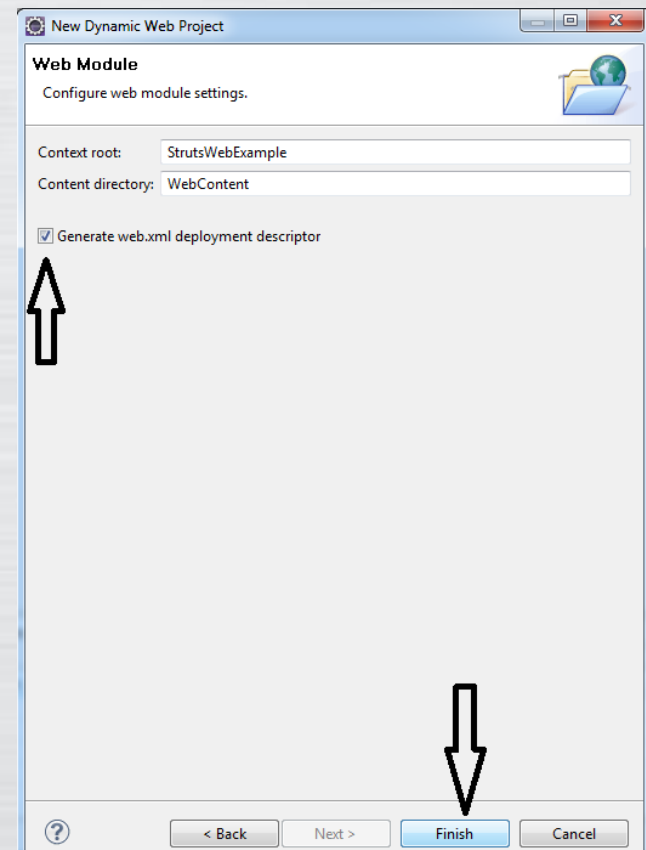

Working sets

☐ Add project to working sets

Working sets:

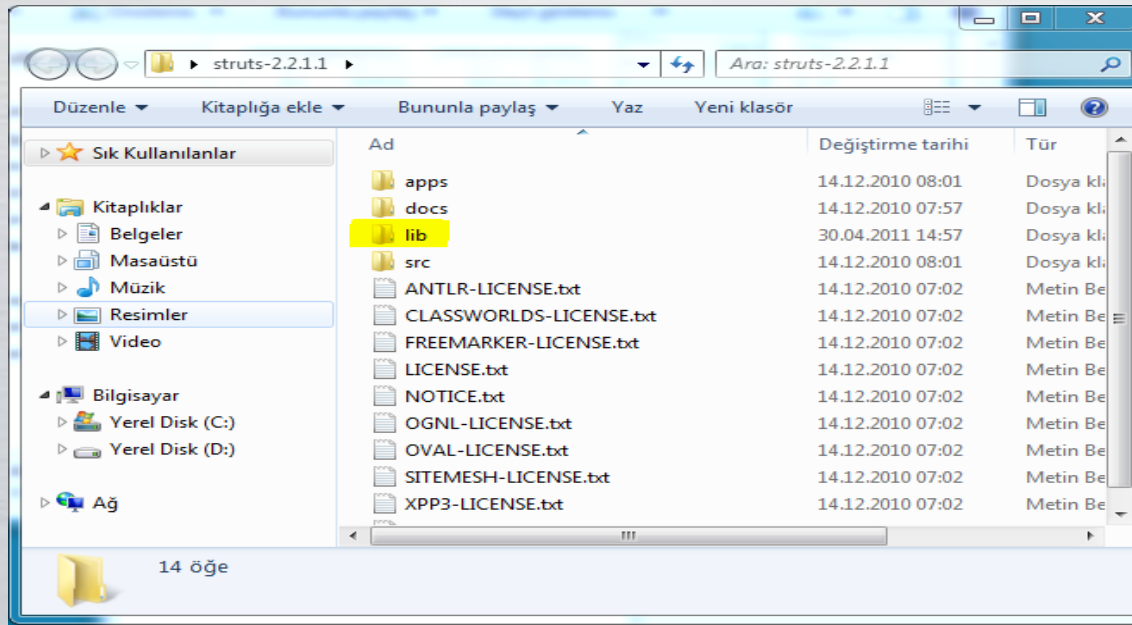

- **Generate web xml deployment descriptor** seçeneği işaretlenir ve **Finish** butonuna basılarak web projesi oluşturulmuş olur.

# Struts Kütüphanelerinin Eklenmesi

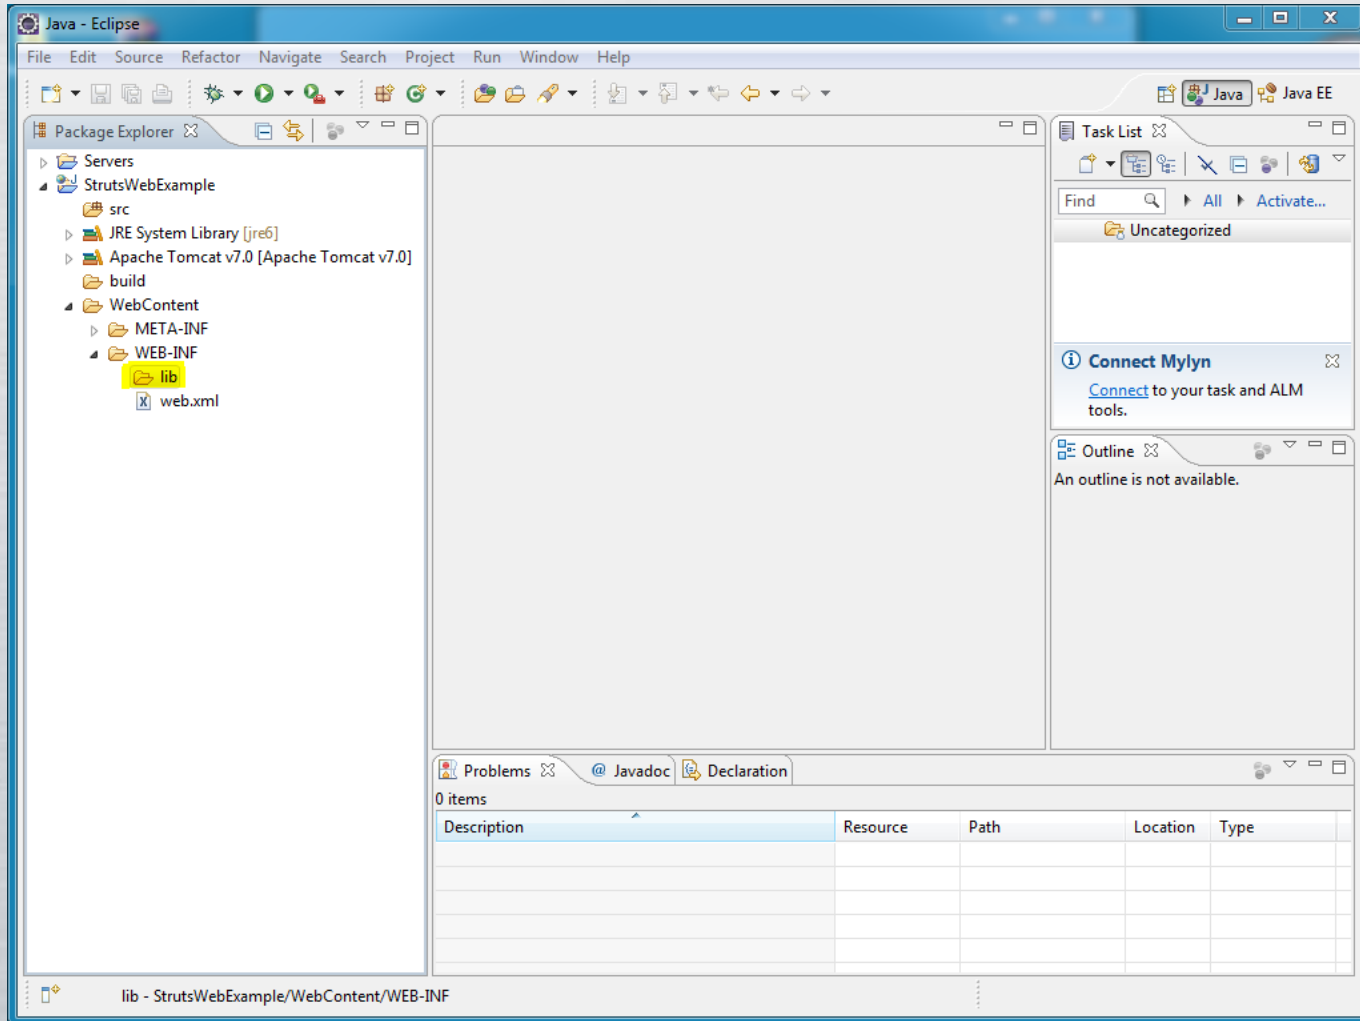

- İndirilen **struts-2.2.1.1** klasörünün içindeki **lib** klasörüne girilir ve gerekli olan **jar** dosyaları kopyalanır. Bu projede örnek olarak “**commons-fileupload, commons-io, commons-logging, freemaker, ognl, spring-test, struts2-convention-plugin, struts2-core, struts2-junit-plugin, xwork-core**” isimli kütüphaneler eklenmiştir.

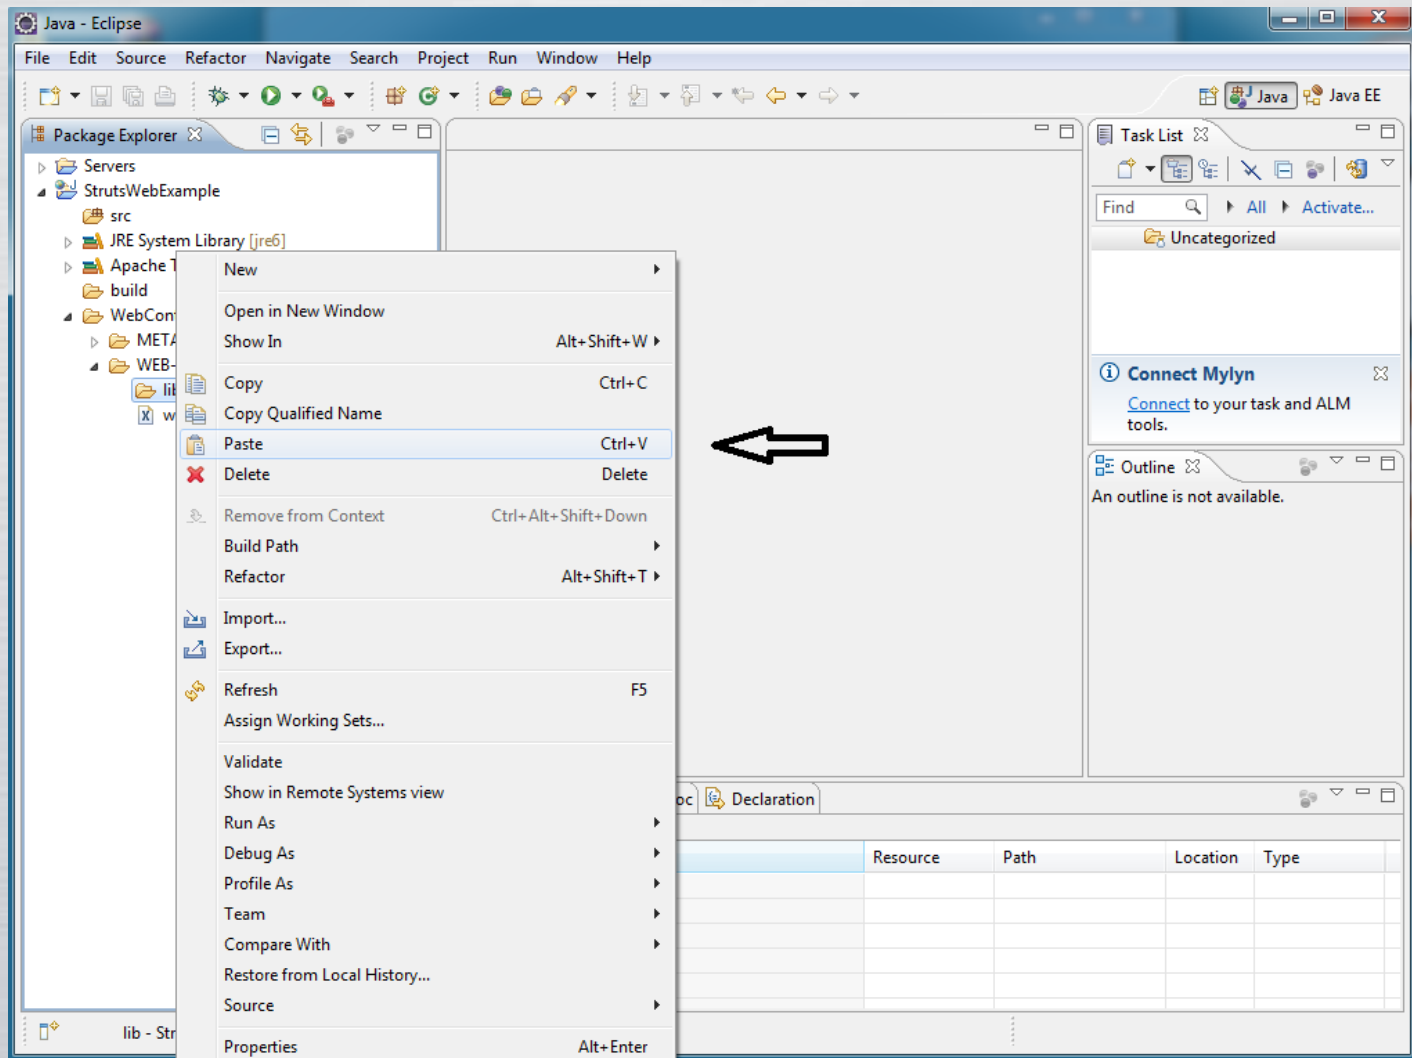

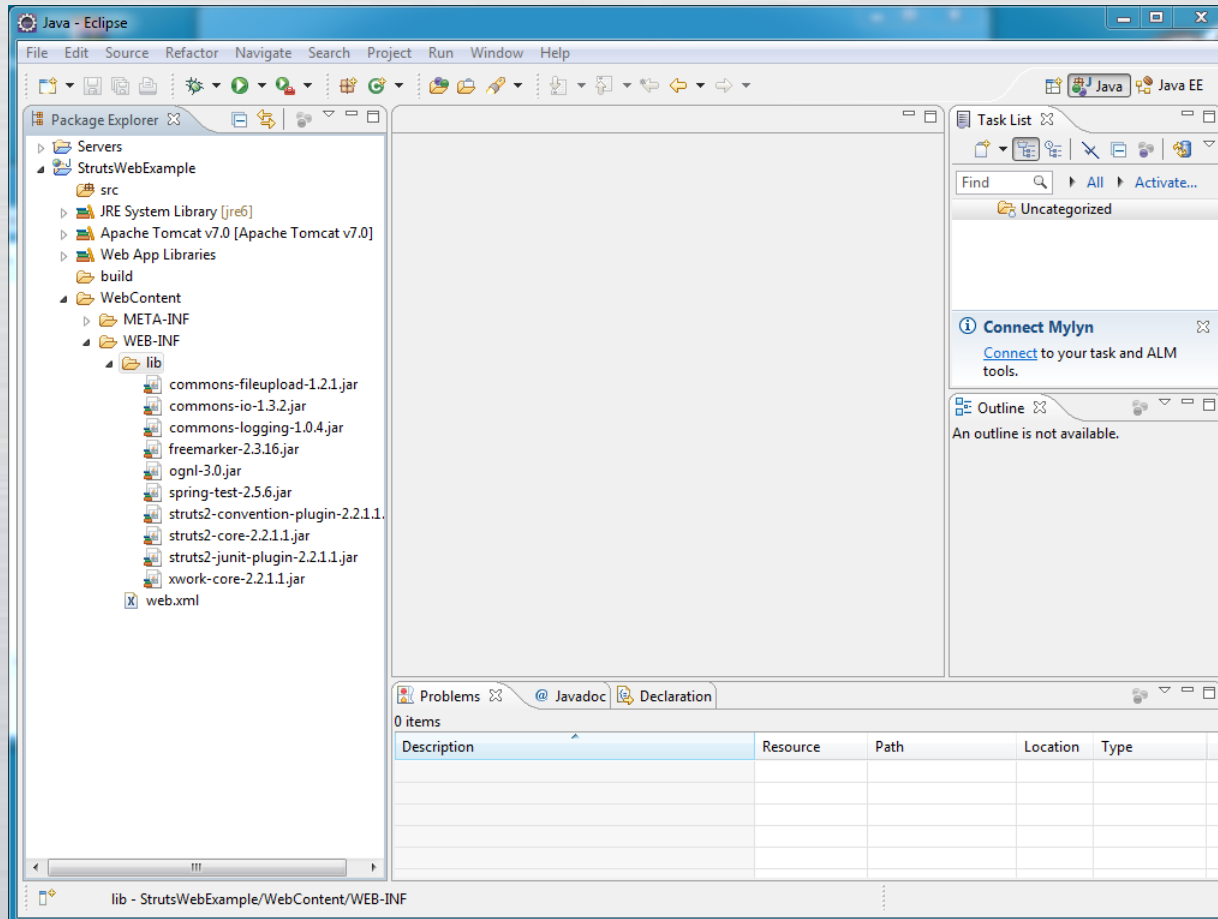

- Eclipse 'te oluşturduğumuz projede **WEB-INF** klasörü içerisindeki **lib** klasörüne kopyaladığımız **jar** dosyaları yapıştırılır.

# Struts2 Kütüphanelerinin Web Projesine Eklenmiş Hali

# Örnek Uygulamada Kullanılacak Kütüphaneler

- Yapmış olduğumuz örnek uygulamada “ **commons-beanutils, commons-digester, commons-fileupload, commons-io, commons-logging, freemaker, junit, ognl, spring-test, struts-config-browser-plugin, struts2-convention-plugin, struts2-core, struts2-tiles-plugin, xwork** ” isimli kütüphaneleri kullandık.

# Struts2 Kütüphanelerinin Örnek Uygulama Projesine Eklenmiş Hali
